Type de support : Volume

Titre(s) : Intercept : the secret history of computers and spies / Gordon Corera

Auteur(s) : Corera, Gordon (19..-....)

Publication : London : Weidenfeld & Nicolson

Date de copyright : C 2015

Description matérielle : 1 vol. (431 p.) ; 24 cm

ISBN : 978-0-297-87173-6

0-297-87173-0

978-0-297-60945-2

EAN : 9780297609452 br.

Autre variante du titre : [Secret history of computers and spies.]

Classification décimale Dewey : 327.12

Note sur les bibliographies et les index : Notes bibliogr. Index

Résumé ou extrait : Présentation de l'éditeur : "Intercept is the previously untold - and highly classified - story of the melding of technology and espionage. Gordon Corera's compelling narrative takes us from the Second World War through the Cold War and the birth of the internet to the present era of hackers and surveillance. Rich with historical detail and characters, as well as astonishing revelations about espionage carried out in recent times by the UK, US and China, this is the secret history of how spying drove the rise of the computer. Within the confines of Britain's Second World War code-breaking establishment at Bletchley Park, the work of men like Alan Turing led to the birth of electronic espionage and the first computer, Colossus. In the following decades, computers have transformed the business of espionage, from Cold War spy hunting to today's data-driven pursuit of terrorists and industrial-scale cyber-espionage against corporations."
