Titre(s) : An ontology for unconventional conflict / Dean S. Hartley III

Auteur(s) : Hartley III, Dean S. (19..-....)

Publication : Cham : Springer

Date de copyright : C 2018

Description matérielle : 1 vol. (XXIX-387 pages) : ill., tabl. ; 24 cm

Collection : Understanding complex systems 1860-0832

ISBN : 978-3-319-75336-2

EAN : 9783319753362 rel.

Appartient à la collection : Understanding complex systems (Print) 1860-0832

Classification décimale Dewey : 355.07

Note sur les bibliographies et les index : Bibliographie pages 379-381. Index

Note sur le contenu : Introduction Overview of the Unconventional Conflict Ontology Actor Ontology Action Ontology Environment Ontology Metric Ontologies Stocks-and-Flows Ontology Semantic Concept Ontology Situation-Dependent Ontology Theories Ontology Complexity and Emergent Properties Conclusion

Résumé ou extrait : La 4e de couv. indique : "This book describes the ontology structure, types of actors, their potential actions, and ways that actions can affect the things that are part of the conflict. An ontology of unconventional conflict supports the understanding of unconventional conflict in general. It also provides a tool for understanding and investigating a particular unconventional conflict. The ontology specifies the relations among the elements and supports creating a description of a particular situation. Unconventional conflict spans the range from natural disasters through human disagreements to irregular warfare (up to conventional war). Unconventional conflict involves damage to things and injuries to people; however, the critical factors are the actions, reactions, and opinions of people, including political, military, economic, social, infrastructure, and information components. This ontology supports and will

appeal to military strategists, political scientists, economists, and politicians in understanding their planning for, and managing of these conflicts."
