Titre(s) : Cyber warfare : military cross-border computer network operations under international law / Johann-Christoph Woltag

Auteur(s) : Woltag, Johann-Christoph

Publication : Cambridge (GB) [etc.] : Intersentia

Date de copyright : C 2014

Description matérielle : 1 vol. (XVII-313 p.) ; 25 cm

Collection : International Law 14

ISBN : 978-1-7806-8226-6

EAN : 9781780682266

Appartient à la collection : International law Jan Wouters, general editor Oxford Intersentia [2007]- 14

Classification décimale Dewey : 345.026 82

Note sur les bibliographies et les index : Bibliogr. p. 279-313

Note de thèses et écrits académiques : Thesis (Ph. D) Droit international University of Hamburg 2013

Résumé ou extrait : La jaquette indique : "In the last five years the topic of cyber warfare has received much attention due to several so-called 'cyber incidents' which have been qualified by many as State-sponsored cyber attacks. This book identifies rules and limits of cross-border computer network operations for which States bear the international responsibility during both peace and war. It consequently addresses questions on jus ad bellum and jus in bello in addition to State responsibility. By reference to treaty and customary international law, actual case studies (Estonia, Georgia, Stuxnet) and the Tallinn Manual, the author illustrates the applicability of current international law and argues for an obligation on the State to prevent malicious operations emanating from networks within their jurisdiction."
