Résumé ou extrait : La 4e de couv. indique : "This concise book provides readers with a comprehensive overview and critical assessment of the key issues and varied strands of research relating to immigration and religion that have been produced during the past two decades. Religion, once a neglected topic in migration studies, is today seen as a crucially important aspect of the immigrant experience. For some - particularly those focusing on religion in North America - religion has been portrayed as a vital resource for many immigrants engaged in the essential identity work required in adjusting to the receiving society. For others - particularly those who have focused on Muslim immigrants in Western Europe - religion tends to be depicted as a source of conflict rather than one of comfort and consolation."
