Résumé ou extrait : This book builds a powerful narrative that constructive dissent, constructive disobedience, and positive defiance are positive tools for the long-term sustenance of an organisation. They are an extension of integrity, moral courage and value-based leadership. Covered in sixteen chapters, the book critically examines the theme in all its dimensions. Interesting case studies on the 'My Lai Massacre', General Mark Milley, Chairman of the Joint Chiefs of Staff, in dealing with a reckless US President in 20-21 and the India-China conflict highlight the complexities and the challenges involved. A critical analysis of the Indian bureaucracy compels serious introspection for overhaul. The wars in the last 100 years, mostly of choice and not necessity, meet the definition of 'Folly' and the 'Law of Stupidity'.
