Titre(s) : Oceans rise empires fall : why geopolitics hastens climate catastrophe / Gerard Toal

Auteur(s) : Ó Tuathail, Gearóid (1962-....)

Publication : New York (N.Y.) : Oxford University press

Date de copyright : C 2024

Description matérielle : 1 vol. (270 p.) : jaquette illustrée en couleurs ; 25 cm

ISBN : 978-0-1976-9326-1
0-19-769326-1

EAN : 9780197693261 rel.

Classification décimale Dewey : 551.63

Note sur les bibliographies et les index : Notes bibliogr. p. [215]-259. Index

Résumé ou extrait : "Oceans Rise Empires Fall: Why Geopolitics Hastens Climate Change discusses how geopolitics affects climate change by highlighting its catastrophic effects. Even though states would prefer to reduce emissions in the abstract, they would always prioritize access to carbon-based fuels necessary for generating economic growth to compete with rival states. Thus, geopolitical competition ramps the difficulty of implementing effective climate change policies. Oceans Rise Empires Fall discusses how the Ukraine and Russia conflict exposed priorities such as territorial control and fossil fuel acquisition over a zero-carbon future. It explains that competitive territorial, resource, and technological dramas obscured the deterioration of the planet's life support systems."

Sujet - Nom commun : Géopolitique -- Environnement

Changements climatiques

Pollution

Nuisances

Développement économique -- Environnement
