Calhoun Fires and combined arms maneuver: the Battle of Vimy Ridge, 9 April 1917 / by David Thuell and Thomas G. Bradbeer The future of fires: dominating in large-scale combat operations / by Major General Wilson A. Shoffner and Colonel Christopher D. Compton

Résumé ou extrait : "Part of The US Army Large-Scale Combat Operations Series, Lethal and Non-Lethal Fires is a collection of 11 historical case studies involving lethal and non-lethal fires from the period 1917 through 1991 with lessons for military professionals who will be engaged in future large-scale combat operations. The chapters range from the First World War through Desert Shield/Desert Storm and provide an overview of an engagement, battle, or campaign; the doctrine that applied; and how leaders addressed various challenges and the lessons they learned. The book concludes with a chapter addressing the future of fires and how to address complex mission during multi-domain operations."--Provided by publisher
