Résumé ou extrait : "Examines radicalization and de-radicalization of extremists in a world of globalization."

This book examines the twin phenomena of radicalization and de-radicalization in a global context of political extremism and violent conflict, focusing on the approaches of governments in how they use counterterrorism to respond to radicalization and extremism. By using case studies and comparative analysis, the authors' analysis of both Western and non-Western examples focuses on theoretical components and practical aspects of the de-radicalization process. Christie and Ahmad point to solutions adopted by states to mitigate the threats and reintegrate extreme militants into society, creating a more

stable, less violent world.
