Note sur les bibliographies et les index : Notes bibliogr. Index

Résumé ou extrait : This interdisciplinary book brings together innovative chapters that address the entire spectrum of the African peacebuilding landscape and showcases findings from original studies on

peacebuilding. With a range of perspectives, the chapters cover the full gamut of peacebuilding (i.e. the continuum between conflict prevention and post-war reconstruction) and address both micro and macro peacebuilding issues in the five regions of Africa. Moving beyond the tendency to focus on a single case study or few case studies in peacebuilding scholarship, the chapters examine critical peacebuilding issues at the local, state, regional, extra-regional, and continental levels in Africa. This book will be of key interest to scholars and students of African politics, peace and security studies, regional organizations, development studies, state-building, and more broadly to international relations, public policy, diplomacy, international organizations, and the wider social sciences.
