Date de copyright : C 2022

Description matérielle : 1 vol. (XIV-430 p.) : ill., graph., cartes ; 25 cm

ISBN : 978-1-83910-569-2
1-83910-569-0

EAN : 9781839105692 rel.

Classification décimale Dewey : 337

Note sur les bibliographies et les index : Bibliogr. en fin de chapitres. Index

Résumé ou extrait : "The Research Handbook on Trade Wars presents an informative and in-depth account of the origins, dynamics, and implications of trade wars, which are growing both in scale and scope in today's increasingly interdependent global economy. Timely and comprehensive, it provides a holistic understanding of trade wars, including not only the domestic and international factors that influence the pattern of trade war onset and escalation, but also the stakeholders and processes that shape the outcomes of such highly intense trade conflicts. Leading scholars in the field present original and thought-provoking research material, critically engage with academic and policy debates, and make theoretical contributions as well as valuable policy recommendations. In addition to its in-depth analysis of the global, domestic, political, and economic origins of trade wars, this Research Handbook also examines the variation in the scope of trade wars, the forum for dispute settlement, the factors that influence the pattern of dispute escalation, and the linkages between national security considerations and commercial conflicts. Providing the frameworks necessary for understanding the political and economic logics of trade wars, this Handbook will be a valuable source of reference for researchers, government officials, businesses, and post-graduate students interested in international political economy, international economics, economic statecraft, public policy, and international relations."
