Lanuza Bridging the sovereign gap : the Five Eyes, transgovernmental networks, and the state in a digitally connected world / Bartholomew Rockwell Csorba The Anglo archipelago : how AUKUS and the Anglosphere are shaping the global security

calculus / Tim Legrand Constitutional challenges in combatting disinformation and the Five Eyes alliance / Andrew Ray, Heather Roberts, and Damian Clifford Digital (dis)Information operations : lessons learned / Melissa-Ellen Dowling

Résumé ou extrait : "This book offers an interdisciplinary insight into the key debates around information warfare in the digital age and argues that transnational cooperation can mitigate the threat. States and societies are increasingly vulnerable to cyber-enabled information operations. From efforts to divide nations, undermine public policy, manipulate elections, and generate social discord, malign actors use the online realm to wreak havoc on our offline lives. The book explores the digital disinformation dilemma that confronts liberal democracies, reflecting on shared socio-political challenges and solutions to contemporary information operations amongst the Five Eyes states and beyond. The work aims to generate a holistic human-centric perspective on the challenges of digital (dis)information operations through interdisciplinary insight into shared challenges and solutions to contemporary information warfare. Together, these perspectives enable us to more effectively identify opportunities to address the challenge and increase the potential to enrich international collaborative efforts to safeguard liberal democracies from threats to their information environments. This book will be of much interest to students of information warfare, intelligence studies, foreign policy and International Relations." (page d'avant-titre)
