Résumé ou extrait : This book offers an in-depth investigation into the dynamic relationship that exists between geoeconomics and geopolitics in the context of contemporary economic corridors. It dives deep into the strategic significance of economic corridors, which are essential arteries of trade, investment, and connection across regions and nations. It examines how a variety of geopolitical issues have an impact on the creation, management, and exploitation of these corridors, hence influencing the dynamics of regional power and the tendencies of the global economy. The book takes a multidisciplinary approach to investigate the intricate relationships that exist between economic interests, political aspirations, and security concerns throughout significant economic corridors all over the world. It investigates how governments, multinational enterprises, and international organizations negotiate the complex environment of geoeconomic competitiveness and geopolitical conflicts to maximize their strategic advantages and minimize the risks. It is beneficial for policymakers, corporate executives, and academics who are interested in understanding and navigating the dynamic convergence of geoeconomics and geopolitics in the arena of economic corridors with practical insights.
