

Smarter power, stronger partners

Type de contenu : Texte

Type de médiation : sans médiation

Type de support : Volume

Titre(s) : Smarter power, stronger partners . Volume II, Trends in force projection against potential adversaries / Duncan Long, Terrence K. Kelly, David C. Gompert, editors ; Scott Boston, Michael S. Chase, Jeffrey Engstrom,...[et al.], contributors

Autre(s) responsabilité(s) : Long, Duncan (Éditeur scientifique)
Kelly, Terrence K. (Éditeur scientifique)
Gompert, David C. (Éditeur scientifique)
Arroyo center Santa Monica, Calif - Éditeur scientifique
États-Unis - Éditeur scientifique
Rand corporation - Éditeur scientifique

Publication : Santa Monica (Calif.) : Rand corporation

Date de copyright : C 2017

Description matérielle : 1 vol. (XXXIII-284 pages) : ill., cartes, graph., fotogr., tabl. ; 23 cm

Collection : [Research report] RR-1359/1--A

ISBN : 0-8330-9704-0
978-0-8330-9704-0

EAN : 9780833097040 br.

Appartient à la collection : [Research report] RR-1359/1--A

Autre variante du titre : [Trends in force projection against potential adversaries.]

Classification décimale Dewey : 355.020 112

Note(s) : "RR-1359/1-A"
Avant-titre : " RAND Arroyo Center"
La p. de titre porte en plus : "Prepared for the United States Army"
"This report is the second in a two-volume series"

Note sur la description bibliographique : Consultable à l'adresse

Note sur les bibliographies et les index : Bibliographie pages 277-284

Résumé ou extrait : La 4e de couv. indique : "This volume describes nine warfighting scenarios, some set in 2015 and some set in 2025. The principal purpose of these scenarios is to test the hypothesis that the anti-access and area-denial (A2AD) threat to U.S. force projection is growing more severe in critical regions. The potential adversaries in the scenarios are China, long recognized for its A2AD capabilities, as well as Russia and Iran. Both the 2015 and 2025 scenarios describe plausible U.S. and adversary military actions based on common understanding of current operational capabilities and approaches. The scenarios show that the A2AD capabilities of important potential adversaries are likely to increase in significant ways over time, threatening U.S. strategic interests. In particular, adversaries' ability to conduct A2AD at distance is likely to increase, to the detriment of U.S. force projection. Further, the U.S. response under current strategy and operational approaches to defeating A2AD could lead to conflict escalation and, in some cases, increased risk of nuclear war. This volume is a companion to Smarter Power, Stronger Partners, Volume I: Exploiting U.S. Advantages to Prevent Aggression (by Terrence K. Kelly, David C. Gompert, and Duncan Long, Santa Monica, Calif.: RAND Corporation, RR-1359-A, 2016)."

Sujet - Collectivité : États-Unis Army.

Sujet - Nom commun : État de préparation opérationnelle (science militaire)

Planification militaire -- États-Unis -- Évaluation

Sécurité internationale -- 1990-2020

Opérations combinées (science militaire) -- Évaluation
