Note sur les bibliographies et les index : Notes bibliogr. en fin de contributions. Index

Résumé ou extrait : La 4e de couverture indique : "Researchers in the rapidly growing field of intelligence studies face unique and difficult challenges ranging from finding and accessing data on secret activities, to sorting through the politics of intelligence successes and failures, to making sense of complex socio-organizational or psychological phenomena. The contributing authors to Researching National Security Intelligence survey the state of the field and demonstrate how incorporating multiple disciplines helps to generate high-quality, policy-relevant research. Following this approach, the volume

provides a conceptual, empirical, and methodological toolkit for scholars and students informed by many disciplines: history, political science, public administration, psychology, communications, and journalism. This collection of essays written by an international group of scholars and practitioners propels intelligence studies forward by demonstrating its growing depth, by suggesting new pathways to the creation of knowledge, and by identifying how scholarship can enhance practice and accountability."

Sujet - Nom commun : Sécurité nationale -- Recherche  
Services de renseignements militaires -- Recherche
