Edelstein Parsing and Managing US-China Competition / David Shambaugh Forecasting the Future of US-China Relations / Evan S. Medeiros

Résumé ou extrait : "Cold Rivals brings together a distinguished group of scholars from the United States and China to examine the new era of strategic competition in US-China relations. The two countries are now competitors locked in a long-term rivalry, but how volatile the rivalry will become is still to be determined. The book explores not only the historical roots and contemporary foreign policy aspects of this era, but the volume also looks at the economic, military, and technological arenas of US-China strategic competition. In doing so, this volume highlights important differences in US and Chinese perspectives. A final section of the volume explores future scenarios for the relationship from different perspectives but with all of them coming to the sobering conclusion about a future marked by expanding differences, growing tensions, economic disengagement, and pressures for a global competition. This policy-relevant book provides a comprehensive overview of US-China strategic competition and reinvigorates thinking about how to avoid reaching a crisis point." (éd.)
