Résumé ou extrait : "This volume examines the global media coverage of the armed conflict in Ukraine, focusing on the marginalization of dissident perspectives in the West and the information quality and diversity on social media. Along with presenting original, empirical studies on how mainstream media in countries as diverse as Israel, the Czech Republic, Ghana and the Netherlands have covered the conflict between NATO and Russia since 2022, this book sheds light on the role of the state and the media in policing the boundaries of permissible thought on the conflict in the West, as well as in Russia and Ukraine. It also delves into the war's representation on prominent social media platforms. Written by a diverse group of international researchers, this multifaceted volume offers new perspectives and insights on the reporting of the ongoing conflict. It will interest scholars of international communication and media, foreign policy and international politics, war and conflict, content analysis, and journalism." (p. de garde)
