Note sur les bibliographies et les index : Index

Résumé ou extrait : Blackford started out as one of General Stuart's staff and then was detailed to the ANV Engineer Corps He's acerbic opinionated and occasionally thickheaded (as when he fails to notice during the retreat to Appomattox that anything is wrong He gives a good description of the Battle of First Manassas and accounts of several other battles and campaigns including Gettysburg Although Blackford is justly best known as a Stuart chronicler the most unique information given in the memoir is the description of how the Engineer Corps built the trenches at Petersburg Blackford's endearing descriptions of his horses add a human touch
