Résumé ou extrait : "Exploring the geopolitics of the Indo-Pacific region, a major hub of global economic/commercial, military, diplomatic and cultural activities in the 21st century, this textbook provides students with an introduction to the existing debates, frameworks and issues surrounding the Indo-Pacific. The book explains the historical background to highlight the significance of the region, the shift of power from West to East and the importance of the growing connectivity between Asia-Pacific and the Indo-Pacific areas. Covering relations between China and the USA, India, Vietnam and China's southern neighbours in South East Asia, along with Japan, Taiwan, Australia, Sri Lanka and Myanmar, it presents the different arguments regarding the caveats and meaning of 'Indo-Pacific.' In so doing, it shows that the region is the "theatre" of great power and middle power competition and suggests that third parties have an area of autonomy in their dealing with the American and Chinese leaders. Complete with a list of further readings, Geopolitics and the Indo-Pacific Region fills a gap in the market and will be of great interest to upper level undergraduates, postgraduate students and researchers studying International Relations, IPR, Geopolitics, Asian Politics and Asian Security Studies"-- (4e de couv.)
