Résumé ou extrait : "This updated and revised second edition of the Routledge Handbook of Peacebuilding contains cutting-edge analyses of contemporary attempts to reach and sustain peace. The book covers the main actors and dynamics of peacebuilding, as well as the main challenges that it faces, with accessible chapters. The volume is comprehensive, covering everything from the main international institutions for peacebuilding to the links between peacebuilding and climate change, or peacebuilding and trauma. It is also firmly interdisciplinary, with a number of chapters devoted to showcasing how different disciplines interpret peacebuilding and how they contribute to it. Bringing together leading thinkers and practitioners on peacebuilding, many from the Global South, the handbook offers a valuable "hands-on" perspective on how peace can be secured and sustained. There is a significant emphasis on comparison and the book shows how peacebuilding is best examined from the vantage point of multiple cases. The book is organised into six thematic sections: Part I: Architecture and Actors Part II: Reading

Peacebuilding Part III: Issues and Approaches Part IV: Violence and Security Part V: Everyday Living
Part VI: Disciplinary Approaches This book will be essential reading for students of peacebuilding,
mediation and post-conflict reconstruction, and of great interest to students of statebuilding, intervention,
civil wars, conflict resolution, war and conflict studies and IR in general." (4e de couv.)
