Résumé ou extrait : "The United Arab Emirates (UAE) has elaborated its own philosophy of security. Driven by emergencies and increasing risks, both in the region and globally, Emirati authorities have developed a sense of anticipation as well as an agility to react promptly to new threats through the ability to assess the risks in any given situation. War and the avatars of conflict are a constant reality in the Middle East. Transnational threats, including the regional context, the war in Yemen, insecurity in the Levant and tensions with Iran affect the overall stability of the Peninsula and consequently that of the UAE. Because of the inclusion of the UAE in the networks of globalization, non-traditional security issues are not relegated to the background. Issues such as COVID-19, immigration, cybersecurity and human trafficking need to be addressed domestically as well as globally. This volume offers a comprehensive and multifaceted examination of the traditional and non-traditional security measures present in the UAE that allow the country to remain politically stable in an otherwise volatile region, aiming to offer a comprehensive overview of all forms of security in the UAE."
