

Can Taiwan resist a large-scale military attack by China ?

Type de contenu : Texte

Type de médiation : sans médiation

Type de support : Volume

Titre(s) : Can Taiwan resist a large-scale military attack by China ? : assessing strengths and vulnerabilities in a potential conflict / Timothy R. Heath, Sale Lilly, Eugeniu Han

Auteur(s) : Heath, Timothy R

Autre(s) auteur(s) : Lilly, Sale
Han, Eugeniu (19..-....)

Autre(s) responsabilité(s) : États-Unis - Éditeur scientifique
International security and defense policy Center - Éditeur scientifique
Rand corporation - Éditeur scientifique

Publication : Santa Monica (Calif.) : Rand, 2023

Description matérielle : 1 vol. (XI-89 p.) : ill., graph., tabl. ; 23 cm

Collection : Research report RR-A1658-1

ISBN : 1-977408-64-8
978-1-977408-64-8

EAN : 9781977408648

Appartient à la collection : Research report RR-A1658-1

Classification décimale Dewey : 355.033 051

Note(s) : "Rand national defense research Institute"
"Prepared for the Office of the Secretary of Defense"

Note sur les bibliographies et les index : Bibliogr. p. 83-89

Note sur le contenu : Chapter One: Introduction Chapter Two: Key Variables for a Country's Capacity to Resist an Attack Chapter Three: Peacetime Assessment of Taiwan's Capacity to Resist a Large-Scale Attack Chapter Four: How a Crisis or Conflict Might Affect Taiwan's Capacity to Resist a Large-Scale Attack Chapter Five: Conclusions, Implications, and Recommendations Appendix A: Taiwan's Economic

Dependence on China Appendix B: China's Potential Tools of Economic Coercion Appendix C: Taiwan's Options for Countering China's Economic Coercion

Résumé ou extrait : Taiwan remains an important potential flashpoint between China and the United States. Given the geographic distance between the United States and Taiwan and the military challenge of defeating a major attack by China, an accurate assessment of Taiwan's ability to sustain a defense can be a critical factor for U.S. decisionmakers and planners. In this report, the authors develop a framework for assessing a country's capacity to resist a large-scale military attack. In that framework, a country's ability to withstand such an attack depends on four variables: political leadership and social cohesion, military effectiveness, durability, and military intervention by an ally. The authors then use that framework to assess Taiwan's capacity to resist an attack by China for 90 days—a posited minimum amount of time required for the United States to marshal sufficient forces to carry out a major combat intervention in East Asia. An accurate assessment of Taiwan's ability to withstand a large-scale attack by China could help U.S. decisionmakers and planners better anticipate and respond in such a situation.
