Titre(s) : The environment-conflict nexus : climate change and the emergent national security landscape / Francis Galgano, editor

Autre(s) responsabilité(s) : Galgano, Francis A. (Éditeur scientifique)

Publication : Cham : Springer

Date de copyright : C 2019

Description matérielle : 1 vol. (XIII-181 p.) : ill., cartes, graph., fotogr., tabl. ; 24 cm

Collection : Advances in military geosciences

ISBN : 3-319-90974-6

978-3-319-90974-5

EAN : 9783319909745 rel.

Appartient à la collection : Advances in military geosciences (Print) 2522-8315

Classification décimale Dewey : 363.7
577.274

Note sur les bibliographies et les index : Bibliogr. en fin de chapitres. Index

Résumé ou extrait : La 4e de couv. indique : "The aim of this book is to demonstrate how environmental factors have caused an evolution in the landscape of national security since the end of the Cold War. Through relevant case studies, the scope of the problem on the national security landscape due to environmental stressors is illuminated, examined, and synthesized with climate-related data. Human variables such as governance, GDP, and vulnerability are taken into account, and are compared against environmental factors to more accurately determine the causative agents of regional conflicts which threaten national security. These case studies comprise the majority of the text, and they show how individual conflicts are uniquely influenced by environmental stress with variations from situation to situation. This book will be of interest to government and military professionals, and may serve as a resource for college courses in the areas of military geography, international affairs, and sustainability studies."
