Note sur le contenu : Analytical framework The conceptual component: Soviet strategic thinking and military doctrine in the post-Cold War reforms Historical context Combatants The land domain The air domain The maritime domain Information and cyber aspects of the war The resilience of the Ukrainian people International military assistance Final considerations: Modern warfare and resilient fighting power

Résumé ou extrait : "This book provides a systematic analysis of the Russian-Ukraine War, using the concept of resilient fighting power to assess the operational performance of both sides during the first year of the full-scale invasion. The Russian war in Ukraine began in 2014 and continued for 8 years, before the full-scale invasion of February 24, 2022. It is not a new war, but the intensity of the warfighting revived many discussions about the conduct of inter-state warfare, which has not been seen in Europe for decades. This book does not aim to offer an exhaustive operational analysis of the war, but rather provides a preliminary systematic analysis across various domains of warfare, using the concept of fighting power to assess the operational performance of both sides. First, the book discusses the

conceptual component and the post-Cold War adaptations of the Soviet strategic tradition by both the Ukrainian and the Russian Armed Forces. Following that, it gives an evaluation of the various aspects of warfighting in the land, air, maritime and cyber domains. Then, the book examines the role of international allied assistance, sanctions and weapons delivery in strengthening the resilience of the Ukrainian Armed Forces. The book concludes with some comments on the role of inter-state warfare in the current strategic environment and future warfare. This book will be of much interest to students of military and strategic studies, defence studies, foreign policy, Russian studies and International Relations." (quatrième de couverture)
