Résumé ou extrait : "Politics of Impunity investigates the failure of the anti-impunity agenda in Brazil, from the release of the truth commission report denouncing the crimes of the military regime (1964-1985) in 2014, to the election of the former-paratrooper and far-Right leader Jair Bolsonaro in 2018. Connecting debates on critical military studies, transitional justice and memory studies, the book moves beyond the conditions of implementation of accountability measures. It examines the conditions of possibility of the global anti-impunity agenda: when, how and why the question of impunity came to dominate debates on large-scale political violence."
