Note sur le contenu : Introduction: Climate Change and (In)Security / Timothy Clack, Ziya Meral, and Louise Selisny Section I: Climate Security Contexts Cascading and Systemic Risks from Environmental Change / Tim Benton, Neil Morisetti, and Oli Brown Geopolitics and Security in the Changing Arctic / Kimberly Marten Geopolitics and Security in the Changing Antarctic / Samuel Jardine and Timothy Clack Security Politics of Climate Change in the Levant / Ana Kumarasamy and Simon Mabon Decentering Climate Security: The Research and Policy Implications of Sudden-Onset and Slow-Onset Climate Change / Tom Deligiannis A New Framework for Understanding Risk: The Role of Climate Change in the Northern Triangle / Lauren Herzer Risi Climate Change, Insecurity, and Economic Transformation / Matthew Paterson Section II: Defence and Security Implications Towards a Greener

Alliance: NATO's Energy Efficiency and Mitigation Efforts / Katarina Kertysova The Evolving Climate Change Threat: UK Defence Preparations / Richard Nugee and Timothy Clack Maritime Response to Climate Change / Sherri Goodman, Pauline Baudu, and Rachel Fleishman Climate Disruption to Hidden Networks: Understanding Human-Animal-Ecological Relationships for Conflict and Security / Alex Tasker Climate Intelligence in Theory and Practice / Louise Selisny, Timothy Clack, Tristan Burwell, and Richard Nugee Operational Risks and Opportunities from Climate Change on Western Militaries' Conservation Activities / Richard Milburn Section III: Framings and Reflections Ecological Security: The New Military Operational Priority for Humanitarian and Disaster Response / Thammy Evans and Gary Lewis The Hyperthreat and Politico-Military Response: Outcomes from a Military Appreciation of Entangled Security / Elizabeth Boulton A Reflection on 30 Years of Climate and Conflict / Thomas Homer-Dixon

Résumé ou extrait : "This book offers a multidisciplinary exploration of how climate change is impacting conflicts, contention, and competition in the world. The volume examines how climate change is creating and exacerbating insecurities for millions of people globally, and how states, inter-governmental bodies, and others are attempting to meet challenges today and in the near and medium term. It shows that climate change insecurity is relevant to a battery of security areas, including warfighting, stabilisation, human security, influence, and resilience and capacity building. The volume provides insights into how climate change has and will impact security at different scales and in different localities, including national and ethnic tensions, food and water security, resource competition, mass displacement, and even the recruitment profiles and operations of violent and extremist organisations. With contributions from pioneering researchers and practitioners, the book discusses shifting operational requirements and responsibilities, and the need for clarity around the size and shape of capacity gaps. In addition to practitioners and policy-makers working in these areas, the book will be of significant interest to researchers and students of defence studies, peace and conflict studies, climate change and environmental security, and international relations."
