Note de thèses et écrits académiques : Texte remanié de Doctoral thesis Political science Université libre de Bruxelles 2017 Deconstructing 'indifference' : a critical analysis of the traditional historical narrative on the use of force

Résumé ou extrait : "It is commonly taught that the prohibition of the use of force is an achievement of the twentieth century and that beforehand States were free to resort to the arms as they pleased. International law, the story goes, was 'indifferent' to the use of force. 'Reality' as it stems from historical sources, however, appears much more complex. Using tools of history, sociology, anthropology and social psychology, this monograph offers new insights into the history of the prohibition of the use of force in international law. Conducting in-depth analysis of nineteenth century doctrine and State practice, it paves the way for an alternative narrative on the prohibition of force, and seeks to understand the origins of international law's traditional account. In so doing, it also provides a more general reflection on

how the discipline writes, rewrites and chooses to remember its own history."- (ed.)
