

Conflict resolution using the graph model

Type de contenu : Texte

Type de médiation : sans médiation

Type de support : Volume

Titre(s) : Conflict resolution using the graph model : strategic interactions in competition and cooperation / Haiyan Xu, Keith W. Hipel, D. Marc Kilgour,... [et al.]

Auteur(s) : Xu, Haiyan (1986-....)

Autre(s) auteur(s) : Hipel, Keith W.
Kilgour, D. Marc
Fang, Liping (1964-....)

Publication : Cham : Springer

Date de copyright : C 2018

Description matérielle : 1 vol. (XXXIV-436 p.) : ill., cartes, diagr., tabl. ; 24 cm

Collection : Studies in systems, decision and control 2198-4182 vol. 153

ISBN : 978-3-319-77669-9

EAN : 9783319776699 rel.

Appartient à la collection : Studies in systems, decision and control (Print) 2198-4182 153

Classification décimale Dewey : 658.403

Note sur la responsabilité : Autre contributeur : "Liping Fang" (co-auteur)

Note sur les bibliographies et les index : Bibliogr. en fin de chapitres. Index

Note sur le contenu : Con?ict Resolution in Practice Decision Making in Perspective Con?ict Models in Graph Form Stability De?initions: Simple Preference Stability De?initions: Unknown Preference Stability De?initions: Degrees of Preference Stability De?initions: Hybrid Preference Coalitional Stabilities Follow-up Analysis: Con?ict Evolution Design of a Decision Support System for Con?ict Resolution

Résumé ou extrait : La 4e de couv. indique : "This cutting-edge book presents the theory and practice of the Graph Model for Conflict Resolution (GMCR), which is used for strategically investigating disputes

in any field to enable informed decision making. It clearly explains how GMCR can determine what is the best a particular decision maker (DM) can independently achieve in dynamic interaction with others. Moves and counter-moves follow various stability definitions reflecting human behavior under conflict. The book defines a wide range of preference structures to represent a DM's comparisons of states or scenarios: equally preferred, more or less preferred; unknown; degrees of strength of preference; and hybrid. It vividly describes how GMCR can ascertain whether a DM can fare even better by cooperating with others in a coalition. The book portrays how a conflict can evolve from the status quo to a desirable resolution, and provides a universal design for a decision support system to implement the innovative decision technologies using the matrix formulation of GMCR. Further, it illustrates the key ideas using real-world conflicts and supplies problems at the end of each chapter. As such, this highly instructive book benefits teachers, mentors, students and practitioners in any area where conflict arises."
