Note de thèses et écrits académiques : Texte remanié de Doctoral thesis Political science Deakin University (Australia) ?

Résumé ou extrait : "This book presents a comprehensive analysis of the intricate security situation prevailing in Balochistan. It explores and establishes correlations between the internal structural vulnerabilities and fault lines of the Pakistani state with the external influences exerted on the region. Employing a rigorous examination of both primary and secondary data, the volume critically examines the multifaceted nature of organised violence in Balochistan. In addition to separatist movements, the presence of religious militancy and cross-border terrorism is thoroughly examined. The book delves into the external involvement of regional and global powers in the intricate tapestry of violence within Balochistan, thereby shedding light on the emerging geopolitical landscape and the corresponding power dynamics in the region. It also analyses how the implementation of large-scale developmental initiatives,

particularly facilitated by China under the auspices of the China-Pakistan Economic Corridor (CPEC), has elevated the geostrategic significance of Balochistan while simultaneously entangling it in the vortex of regional power politics. This volume will be of interest scholars and researchers specializing in geopolitics, International Relations, and South Asian studies." (p. de garde)
