Résumé ou extrait : During the Second world war over 250 warships from many Allied navies were sent to the bottom by German U-boats. This ground-breaking study provides a detailed analysis of every sinking for which source material survives from both the Allied and the German sides, resulting in detailed treatment of the fate of 110 vessels, with the remainder summarised in an extensive appendix. Uniquely, each entry is built around a specialist translation of the relevant segment of the war diary (log) of the U-boat in question, taken directly from the surviving originals - remarkably, this represents the first large-scale publication of the U-boat war diaries in any language.

Sujet(s) : Guerre mondiale (1939-1945)

Opérations sous-marines allemandes

Opérations sous-marines britanniques
