Résumé ou extrait : La p. de garde indique : "Aerial Propaganda explores the combined role of the French and British Governments and Armies in creating and distributing millions of aerial newspapers and leaflets aimed at the French population trapped behind German lines. Drawing on extensive research and primary sources the book highlights a previously unknown aspect of psychological warfare that challenges the established interpretation that the occupied populations lived in a state of total isolation. Instead a very different picture emerges from this study, demonstrating that aerial propaganda not only played a fundamental role in raising morale in the occupied territories but also fuelled resistance and clandestine publications."
