KS.11

Note sur les bibliographies et les index : Bibliogr. p. [167]-173. Notes bibliogr. Index

Résumé ou extrait : Présentation de l'éditeur : "In this work, an internationally-respected authority in military ethics describes a wholly new kind of cyber conflict that has utterly confounded the predictions of earlier experts in information warfare. Comparing this "state-sponsored hacktivism" to the transformative impact of "irregular warfare" in conventional armed conflict, Lucas offers a critique of legal approaches to governance, and outlines a new approach to ethics and "just war" reasoning (grounded in the political philosophies of Alasdair MacIntyre, John Rawls, and Jürgen Habermas) that provides both a framework for understanding these newly-emerging norms of practice for cyber conflict, and the basis for a professional "code of ethics" for the new generation of "cyber warriors." "
