Résumé ou extrait : "Great Powers, Grand Strategies offers the analysis of a dozen experts on the "big picture" approaches to the South China Sea dispute. By exploring the international dimensions of this

regional hotspot, Gordon Chang, Bernard Cole, James Fanell, Bill Hayton, and others examine how the military, diplomatic, and economic strategies of the major global actors have both contributed to solutions and exacerbated the potential for conflict. Anders Corr seeks to juxtapose the grand strategies of the great powers to determine the likely outcomes of the South China Sea dispute, as well as evaluate the ways to possibly defuse tensions in the region"
