Note sur le contenu : Existing efforts to implement and enforce standards in the global security industry and their limits What kind of framework is feasible for the global security industry ? Watchdogs Courts and tribunals Accreditation regimes Clubs Harmonization schemes I Harmonization schemes II Toward a global framework to assist states in regulating the global security industry

Résumé ou extrait : Présentation de l'éditeur : "Surveys the existing state of national, international, and corporate-level regulation of the security industry, including more than forty Codes of Conduct. Thirty case studies look at frameworks for implementing and enforcing standards in other global industries such as the extractive, textile and apparel, toy, toxic waste, financial, sporting, chemical, and veterinary industries, drawing lessons from these industries for the security industry. Identifies five different types of implementation and enforcement: a watchdog, an accreditation scheme, an arbitral tribunal, a harmonization scheme, and a club."
