Note sur le contenu : Part I. Revisiting Grand Theories.-1. Introduction: Mixing Water and International Relations Theory 2. The Theories of International Relations and The Hydro-political Cycle: The Hydro-trap and the Anarchic Nature of Water Conflict 3.Exploring the Sub-state-Supra-state Nexus in Transboundary Water Politics 4.Trust in Transboundary Water Cooperation: A Social Constructivist Approach Part II. Conflict and Cooperation over Transboundary Waters 5.Hydro-Hegemony in East and Southeast Asia: The Case of the Lancang/Mekong River 6.Reframing Trans-boundary Water Security 7.Water for Peace Revisited: Reconsidering Securitization's Role in Water Cooperation Part III. Transboundary Water Diplomacy 8.The Evolution of Water Diplomacy Frameworks: The Eu-phrates-Tigris Basin as a Case Study 9.Is Salmon Surprise on the Table? Indigenous Rights and Multi-Stakeholder Diplomacy in the Renegotiation of the Columbia River Treaty 10.The Role of Data Sharing in Transboundary Waterways: The Case of the Helmand River Basin Part IV. New Perspectives on Transboundary Waters 11.Discourses and Hydropolitics: Stock-Taking and Future Directions.-12.The

Upstream-Downstream Structural Disparity and Transboundary Challenges of Public Health  
13. Transboundary Water Management Among Small Island Developing States: Dynamics of Conflict and Cooperation  
14. Conclusion: The Role of IR Theories in Transboundary Water Politics

Résumé ou extrait : This book is the first collection of state-of-the-art research projects analyzing water conflict and cooperation with an explicitly theoretical point of view. Its fourteen chapters offer a comprehensive and up-to-date overview on how the application of various theoretical perspectives can support the work of scholars and practitioners in mitigating water conflict and developing cooperation. The volume starts out from a literature review on the theorization of transboundary waters in International Relations, which prepares the ground for the demonstration of the latest approaches of scholars currently working on this field. The discussion of their findings is divided into four main sections. The first section deals with reflections and critiques on the grand theories of International Relations, proposing new and more nuanced frameworks for understanding and managing transboundary water relations by going beyond the traditional assumptions. The second section focuses on the catalysts and barriers of cooperation, applying theoretical frameworks which reveal the consequences of the dynamics in power relations and institutional frameworks. The third section investigates into the perspectives at the intersections of theory and practice related to the most practical field within the scope of the volume: water diplomacy. The fourth section introduces new perspectives to provide specific entry points for understanding and managing water conflict and cooperation. Overall, the work intends to demonstrate that the theorization of transboundary waters can significantly contribute to the deeper understanding and the more efficient management of water conflicts and cooperation from several aspects. The authors come from diverse backgrounds, and their individual careers are often related to the intersections of theory and practice in the field of transboundary water management. Their expertise covers water issues from all around the globe, which is reflected in the range of the analyzed case studies. The diversity of the experts involved, their backgrounds, their perspectives, the applied theories, and the analyzed cases was an important priority for the editors.
