Galeano, Katrin Galeano, Samer Al-Khateeb, Nitin Agarwal, and Lieutenant Colonel James N. Turner Future large-scale combat operations (LSCO) implications for information operations / by Major General James J. Mingus and Colonel Chris N. Reichart

Résumé ou extrait : "Part of The US Army Large-Scale Combat Operations Series, Perceptions Are Reality provides historical case studies that address the application of information operations in large-scale combat operations. Leaders visualize and understand the operational environment through information. As an element of combat power, information enables decision-making and its transmission aids decisive operations. This volume employs history to stimulate discussion and analysis of the implications of information operations in future large-scale combat operations by exploring past actions, recognizing and understanding successes and failures, and offering some lessons learned from each author's perspective."
