Résumé ou extrait : This book questions the efficiency of propaganda and the affiliated intelligence functions of international organisations by sampling NATO and, to some extent, the UN in peace operations. It examines NATO operations in Bosnia-Herzegovina and Afghanistan in detail as comparative analysis, and considers the commitment of the US military since this is the main driver of the bulk of NATO activities. In addition, the book covers the communication and intelligence activities of the opposing elements in both Bosnia and Afghanistan to offer another comparative approach.
