Résumé ou extrait : Présentation de l'éditeur : "International humanitarian law (IHL) protects persons and property affected by armed conflicts. Focusing on the controversies that impact IHL in practice, this much-anticipated book from leading expert Marco Sassòli discusses when IHL applies, its substantive rules, how to ensure its respect and whether the traditional distinction between international and non-international armed conflicts remains relevant. Sassòli draws on a depth of practical experience to provide invaluable insight and comprehensive guidance on the rules protecting certain categories of persons (for example, civilians, wounded, etc.) during conflict and the rules governing different types of conduct (for

example, occupation, naval warfare, etc.). The book examines how these rules interact with other branches of international law, such as human rights and international criminal law, and how the rules are applied to non-State armed groups. Cross-cutting issues, including terrorism, autonomous weapons, cyber warfare, gender and cultural heritage, are also addressed, providing readers with a well-rounded view of IHL and associated concerns. Structured in a clear and accessible way, this book will be the turn-to resource for scholars, lawyers, civil servants and other actors directly involved in the sphere of IHL. It will also be the essential text for forthcoming generations of students, giving them a solid understanding of both the rules relating to IHL and how they are implemented in practice."
