

How to avoid a climate disaster

Type de contenu : Texte

Type de médiation : sans médiation

Type de support : Volume

Titre(s) : How to avoid a climate disaster : the solutions we have and the breakthroughs we need / Bill Gates

Traduit sous le titre : Climat comment éviter un désastre les solutions actuelles les innovations nécessaires

Auteur(s) : Gates, Bill (1955-....)

Publication : London : Allen Lane

Date de copyright : C 2021

Description matérielle : 1 vol (257 p.) : ill., couv. ill. en coul. ; 24 cm

ISBN : 978-0-241-44830-4
0-241-44830-1

EAN : 9780241448304 rel.

Autre variante du titre : [Solutions we have and the breakthroughs we need.]

Classification décimale Dewey : 363.738

Note sur les bibliographies et les index : Notes bibliogr. p. 237-246. Index

Résumé ou extrait : "To stop global warming and avoid the worst effects of climate change, humans need to stop adding greenhouse gases to the atmosphere. This sounds difficult, because it will be. The world has never done anything quite this big. Every country will need to change its ways, because virtually every activity in modern life - growing things, making things, getting around from place to place - involves releasing greenhouse gases. If nothing else changes, the world will keep producing greenhouse gases, climate change will keep getting worse, and the impact on humans will in all likelihood be catastrophic. But things can change. We already have some of the tools we need - and as for those we don't yet have, everything I've learned about climate and technology makes me optimistic that we can invent them, deploy them, and, if we act fast enough, avoid a climate catastrophe. This book is about what it will take and why I think we can do it."

Sujet - Nom commun : Changements climatiques -- Adaptation
Changements climatiques -- Atténuation
