Résumé ou extrait : La 4e de couv. indique : "This first volume of a two-volume set describes general aspects, such as the historical view on the topic, the role of information distribution and preparedness of health-care systems and preparedness in emergency cases. Part two describes and discusses in detail the pathogens and toxins that are potentially used for biological attacks. As such, the book is a valuable resource for faculties engaged in molecular biology, genetic engineering, neurology, biodefense, biosafety & biosecurity, virology, and infectious disease programs, as well as professional medical research organizations."

Sujet - Nom commun : Armes biologiques -- Mesures de sûreté

Bioterrorisme -- Lutte contre

Armes biologiques -- Contrôle
