

Military geoscience

Type de contenu : Texte

Type de médiation : sans médiation

Type de support : Volume

Titre(s) : Military geoscience : bridging history to current operations / Peter L. Guth, editor

Autre(s) auteur(s) : Guth, Peter L.

Publication : Cham : Springer

Date de copyright : C 2020

Description matérielle : 1 vol. (VI-222 p.) : ill., cartes, graph., tabl. ; 25 cm

Collection : Advances in military geosciences 2522-8315

ISBN : 978-3-030-32172-7
3-030-32172-X

EAN : 9783030321727 rel.

Appartient à la collection : Advances in military geosciences (Print) 2522-8315

Classification décimale Dewey : 355.47

Note(s) : Textes issus de communications, présentés lors d'une conférence internationale, tenue en 2015

Note sur les bibliographies et les index : Bibliogr. en fin de chapitres. Index

Résumé ou extrait : La 4e de couv. indique : "Collection of papers presented at the 11th International Conference of Military Geoscience that was held in 2015. The conference included discussion on a diverse range of geosciences, including military history, military geology, teaching geology from a military prospective, geological influence on the battlefield, and environmental and cultural issues related to management of military lands. Geology and geography have played a significant role in military history, from providing the stone for primitive tools and weapons, to the utilization of terrain in offensive and defensive strategies. Specific to this volume, deserts comprise nearly a third of the Earth's surface and have been the site of numerous battles where the dust, heat, and a lack of food and water have provided challenges to military leaders and warriors. This book examines the role of deserts in past and modern warfare, the problems and challenges in managing military lands in desert regions, and how desert environmental conditions can impact military equipment and personnel."
