Résumé ou extrait : Routledge Readings on Security and Governance in Northeastern India: Resource Conflicts, Militarisation and Development Challenges presents some of the finest essays on a region that stretches across the Northeastern Himalaya, eight Indian States and many tribal and non-tribal peoples. With a lucid Introduction, this and its companion volume, Routledge Readings on Colonial to Contemporary Northeastern India offer a compelling look into the society, polity, contemporary security and developmental issues in northeast India. It covers several critical themes and unravels complexities fraught by the unique biogeography and socio-political history of the region. The fifteen chapters in this multidisciplinary volume, divided into three sections, examine land laws, conflict and resource management and local governance. It discusses the political interplay of ethnicities and resource appropriation in a modernizing, globalizing economy as well as instances of conflicts and violence in highly militarized spaces in the region. It offers an engaged and insightful look into the rural and urban

human development contexts in the region from authors who have contributed significantly to the academic and/or policy discourse on the subject. This book will serve as essential reading for students, scholars, policymakers, practitioners of South Asian studies, Northeast India studies, history, development studies, labour studies, sociology, public administration, environmental studies, law and human rights, regional literature, cultural studies, geography, and economics.
