Note sur le titre et les responsabilités : Titre de couv.

Note sur les bibliographies et les index : Notes bibliogr.

Note sur le contenu : Introduction / Gerald Stang Southeast Europe / Dimitar Bechev Central Europe / Eammon Butler Southern Europe / Simone Tagliapietra The Baltic Sea region / Zuzanna Nowak The North Sea region / Gerald Stang and Kirsten Westphal Patchwork unity : regional approaches inside and outside the EU

Résumé ou extrait : Présentation de l'éditeur : "Two years after the EU formally launched its strategy for an Energy Union, this Report examines the energy challenges facing the different regions of Europe,

investigating shared priorities and common projects, as well as barriers to integration and cooperation. A series of chapters devoted to distinct regions examines what role the Energy Union can play to help address their energy challenges, including those related to energy security and relations with external suppliers. The Report also looks at efforts to push forward with the construction of the Energy Union via regional initiatives, including some that reach beyond the borders of the EU. Such initiatives have shown how progress on all five pillars of the Energy Union is important for the energy security of the EU and how progress need not be uniform across Europe. Notably, the deepening and interconnection of energy markets -- nationally, regionally, within the EU, and beyond its borders -- are central to this process."

Sujet - Nom commun : Sécurité énergétique -- Pays de l'Union européenne
