EAN : 9781978807044 rel.

Appartient à la collection : Genocide, political violence, human rights series New Brunswick Rutgers University Press 20??

Classification décimale Dewey : 364.151

Note sur les bibliographies et les index : Bibliogr. p. 183-206. Index

Résumé ou extrait : Présentation de l'éditeur : "Why do we allow our governments to get away with "bystanding" to genocide? How can we, when alerted to the mass slaughter of innocents, still not take a stand? Reluctant Interveners provides the most comprehensive answers yet to these confronting questions, focusing on the complex relationships between the citizenry, the media, the political elites, and institutions in the most powerful nation in the world, the United States of America. Eyal Mayroz offers a sobering account of the interactions between the governing and the governed, and the dynamics which transformed moral concerns for the lives of faraway "others" into cold political calculations. Exposed are the processes that turned the promise of "never again" to a recurring reality of ever again, the role of the office of the presidency in their advancement, and the resultant image of America as seen by the rest of

the world. In a time of ubiquitous social media and populist revival, a greater role for the U.S. citizenry in decision-making on responses to genocide may be in the cards. The question is, in which directions will these trends take American foreign policy ?"
