

## **Climate change, security risks and conflict reduction in Africa**

Type de contenu : Texte

Type de médiation : sans médiation

Type de support : Volume

Titre(s) : Climate change, security risks and conflict reduction in Africa : a case study of farmer-herder conflicts over natural resources in Côte d'Ivoire, Ghana and Burkina Faso, 1960-2000 / Charlène Cabot

Auteur(s) : Cabot, Charlène (1988-....)

Publication : Berlin Heidelberg : Springer

Date de copyright : C 2017

Description matérielle : 1 vol. (XXXIV-190 p.) : ill., cartes, graph., fotogr. ; 28 cm

Collection : Hexagon series on human and environmental security and peace 1865-5793 vol. 12

ISBN : 978-3-662-56854-5

978-3-642-29236-1

3-642-29236-4

EAN : 9783662568545 br.

Appartient à la collection : Hexagon series on human and environmental security and peace (Print) 1865-5793 vol. 12

Classification décimale Dewey : 577.274

551.63

Note(s) : Issu d'un mémoire en cotutelle

Note sur les bibliographies et les index : Bibliogr. p. 165-179. Index

Note sur le contenu : Part 1: The climate induced Degradation and increased Scarcity of Resources as Factors challenging security Introduction into current Climate Change, Conflict Concerns and Farmer-Herder Conflicts Literature Review: Causal Linkages between Environmental Change and Conflict Part 2: Theoretical Background: The Importance of Political Factors in a precarious Human and Environmental Security challenged by global, regional and local Environmental Changes Theoretical Prisms: Human and Environmental Security and Conflict Reduction The Role of Political Factors in Undermining or Maintaining Environmental and Human Security in a context of Climate Change Part 3:

Case Study: Farmer-Herder Conflicts in Burkina Faso, Côte d'Ivoire and Ghana Background Information  
Methodological Approach to the Case Study Study of the three Research Hypotheses in the three selected Countries

Note de thèses et écrits académiques : Texte remanié de Master's thesis International relations Paris, Institut d'études politiques ?

Texte remanié de Master's thesis International relations Freie Universität (Berlin) ?

Résumé ou extrait : Présentation de l'éditeur : "The environmental impacts of climate change represent challenges to the societies and are anticipated to contribute to the destabilization of their human security, endangering ways of life of human-beings and inducing conflicts. Vulnerable societies are likely to see a surge in conflicts and violence happen. However social, economic and political circumstances mediating environmental changes are fundamental and determine whether the societal challenge will be a conflictive one. In Western Africa, major environmental changes are expected and the region hosts especially vulnerable population groups (i.e. herders and farmers). Political factors might contribute to determining the occurrence, escalation or reduction of conflict between those groups. The influence of integration policies, of the fairness of land tenure, and of decentralization and participation possibilities on conflicts is studied in Côte d'Ivoire, Ghana and Burkina Faso."
