Note de thèses et écrits académiques : Texte remanié de Doctoral thesis History University of Texas at Austin ?

Résumé ou extrait : "This book examines U.S. defense policy toward Israel during the Cold War, emphasizing arms sales, intelligence sharing, and other security cooperation. It argues that strategic interests drove American policy with other considerations, such as domestic politics and shared liberal values, mattering far less. It begins with the presidency of John F. Kennedy and ends with the presidency of George H. W. Bush with a particular focus on government officials: presidents, secretaries of state, secretaries of defense, national security advisors, other administration officials, and senators and Congressmen. The book explores the primacy of security as American officials feared nuclear proliferation, regional war, and a cut-off of oil supplies. All the while, tensions and often bitter

disagreements in the U.S.-Israel relationship abounded over what to do about threats in the Middle East. This volume will be of interest to those studying American relations with the rest of the Middle East and U.S. security partnerships around the world." (4e de couv.)
