Note sur le contenu : Engaging in Irregular Warfare Exploring Courses of Action for Irregular Warfare Recommendations for Successful Implementation of Irregular Warfare Initiatives Conclusions Appendix A: Snapshot Descriptions of the Irregular Warfare Initiatives Appendix B: Estimates of Resources Required for Irregular Warfare Initiatives

Résumé ou extrait : "The U.S. Air Force leadership plans in the near term to identify and implement a range of initiatives for enhancing the service's contributions to irregular warfare (IW) operations and to meet DoD guidance that directs its components to "recognize that IW is as strategically important as traditional warfare." This monograph is the result of a "quick-turn" study to provide the leadership with a menu of actions it could consider both in the very near term and over an extended period to strengthen and expand the Air Force's capabilities to take part in joint and interagency efforts in irregular warfare. Rather than developing detailed endpoints for Air Force capabilities or structure in the future--e.g., what the USAF could look like in, say, 2015--the authors propose solution vectors that could enable the Air

Force to move out quickly while continuing to consider responses to emerging demands in a dynamic IW environment."--Rand web site
