Classification décimale Dewey : 341.47

Note sur les bibliographies et les index : Bibliogr. p. [196]-212. Notes bibliogr. en fin de chapitres. Index

Résumé ou extrait : Présentation de l'éditeur : "The Cold War, the Space Race, and the Law of Outer Space: Space for Peace tells the story of one of the United Nations' most enduring and least known achievements: the adoption of five multilateral treaties that compose the international law of outer space. The story begins in 1957 during the International Geophysical Year, the largest ever cooperative scientific endeavor that resulted in the launch of Sputnik. Although satellites were first launched under the auspices of peaceful scientific cooperation, the potentially world-ending implications of satellites and the rockets that carried them was obvious to all. By the 1960s, the world faced the prospect of nuclear testing in outer space, the placement of weapons of mass destruction in orbit, and the militarization of the moon. This book tells the story of how the United Nations tried to seize the promise of peace through scientific cooperation and to ward off the potential for war in the Space Age through the adoption of the Outer Space Treaty, the Rescue and Return Agreement, the Liability Convention, the Registration Convention, and the Moon Agreement. Interdisciplinary in approach, the book will be of interest to scholars in law,

history and other fields who are interested in the Cold War, the Space Race, and outer space law."
