

A developmental approach to building sustainable security-sector capacity in Africa

Type de contenu : Texte

Type de médiation : sans médiation

Type de support : Volume

Titre(s) : A developmental approach to building sustainable security-sector capacity in Africa / Stephen Watts, Kimberly Jackson, Sean Mann,... [et al.]

Auteur(s) : Watts, Stephen Baldwin (19..-....)

Autre(s) auteur(s) : Jackson, Kimberly (19..-....)
Mann, Sean (19..-....)
Dalzell, Stephen (19..-....)

Autre(s) responsabilité(s) : Rand corporation - Éditeur scientifique

Publication : Santa Monica (Calif.) : Rand

Date de copyright : C 2018

Description matérielle : 1 vol. (XXVI-157 pages) : carte ; 23 cm

Collection : [Research report] RR-2048

ISBN : 0-8330-9911-6
978-0-8330-9911-2

EAN : 9780833099112 br.

Appartient à la collection : Research report RR-2048

Classification décimale Dewey : 355.032 6

Note(s) : Rand RR2048

Note sur la description bibliographique : Consultable à l'adresse

Note sur la responsabilité : Autre contributeur : "Stephen Dalzell" (co-auteur)

Note sur les bibliographies et les index : Bibliographie pages 143-157

Note sur le contenu : The Goal of Sustainable Capacity Development Debating the Goal of Sustainability Principles and Good Practices Derived from Development Experience Challenges to Applying Development Principles to Security Sector Assistance Conclusion and Policy Implications Appendix A: U.S. Programs Relevant to Defense Institution-Building in Africa Appendix B: Research Interviews

Résumé ou extrait : La 4e de couv. indique : "In this report, RAND researchers analyze options to improve the sustainability of security sector assistance (SSA) in the U.S. Africa Command (AFRICOM) area of responsibility. They derive insights from the development community that might usefully be modified to meet the unique challenges of the security sectors of African partner nations. More specifically, they outline five development principles (and associated "good practices") that have particular relevance to building sustainable partner capacity: local ownership; a comprehensive approach; selectivity; harmonization; and long-term, iterative adaptation. The authors review the many challenges that the U.S. Department of Defense faces in applying these principles. Finally, the authors recommend changes to overall SSA structures and specific practices to enhance the sustainability of partner capacity gains."
