Résumé ou extrait : "This book contributes important new insights into how deployment on international military missions affects soldiers and their lives. Using both quantitative data and in-depth interviews, the authors provide a longitudinal perspective covering the participants in these missions before, during, and after deployment on a large range of life outcomes. The research centres around four key themes; who are the men and women who choose to be deployed; why do they choose to be deployed; what challenges do these soldiers face before, during, and after returning home from a mission; and what are the consequences of deployment for the soldiers' individual lives ?
