ISBN : 978-3-030-86883-3

EAN : 9783030868833 rel.

Classification décimale Dewey : 333.79

Note sur les bibliographies et les index : Bibliogr. en fin de chapitres. Index

Résumé ou extrait : This open access handbook is distinguished by its emphasis on international energy, rather than domestic energy policies or international geopolitic aspects. Addressing key topics such as energy production and distribution, renewables and corporate energy structures, alongside global energy trends, regional case studies and emerging areas such as the digitalization of energy and energy transition, this handbook provides a major new contribution to the field of international energy economics. Written by academics, practitioners and policy-makers, this handbook is a valuable and timely addition to the literature on international energy economics.

Sujet - Nom commun : Ressources énergétiques -- Aspect économique
